

X10 PRO's Professional Automated Living<sup>™</sup> (PAL1<sup>™</sup>) provides exciting features and benefits to a home outfitted with its full compliment of products. The PAL1<sup>™</sup> is a potent selling tool for real estate professionals and custom home builders alike. In an industry where it is important to differentiate the homes you build from those your competitors build -- this full "package" features the right mix of extras giving you the opportunity to display *comfort, security and convenience* to potential buyers.

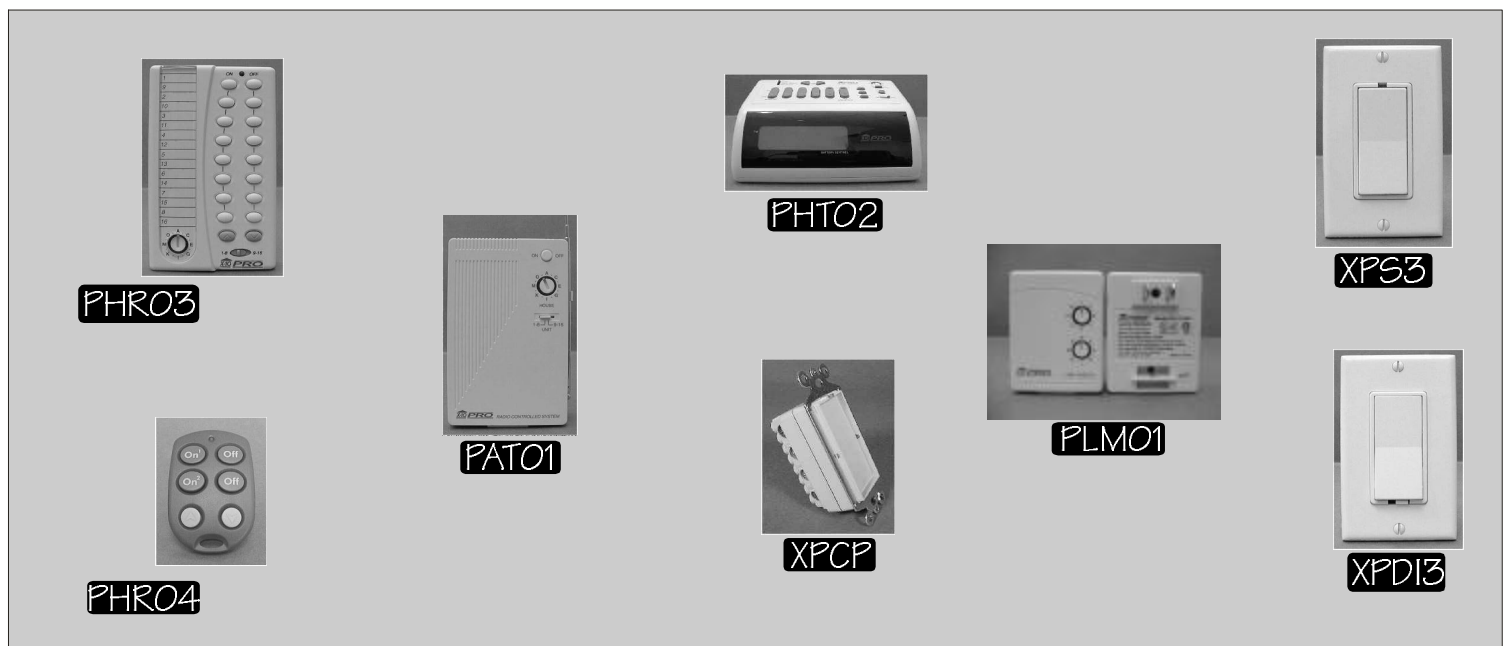

Attention to detail is a common thread in conversations with satisfied owners of custom homes, where the builder has cost-effectively provided all the comforts and features the client has requested.

This unique package provides an excellent foundation

for the home owner appreciating the opportunity of today's lifestyle enhancements. This basic package is a great value-added feature for all homes. Ease of use is the PAL1<sup>™</sup>'s most compelling feature. You will wonder how you ever lived without it!

The open architecture of the X10 PRO system enables homeowners to expand their system right away or even years into the future. As the functions of the room change, the X10 PRO system can easily adapt to the new environment. Add-ons for the system are affordable and easy to obtain.

The power of control is readily at hand, enjoy the convenience and new lifestyle benefits afforded to you with professional automated living.

- ▶ May be integrated with many alarm systems and personal computers too
- ▶ Completely expandable at any time
- ▶ Automatic random lighting control to create the "at home look"

# PAL1™ Application Suggestions

## XPCP - Passive Phase Coupler

Essential for providing X10 communication between sides of phases of the electrical panel.

## XPDI3 - Decorative 500W Inductive Wall Dimmer

For use with inductive or incandescent loads, this switch is great for main bedroom ceiling light(s) or low voltage cabinet lighting. Remember whoever is last into bed has to turn off the lights! Now control the lights on and off or even dimming *while IN bed!*

## XPS3 - Decorative 20A Wall Switch

Great for replacing existing wallswitch inside the home controlling exterior lighting such as Walkways, Entryway(s), Floodlights and Foyer. Provides for both local and remote control. Perfect compliment for fluorescent lights in garage and/or workshops too!

## PLM01 - Plug in 300W Lamp Module

Provides a convenient lamp control for living rooms or nightstand light in main bedroom. Allows dimming for common table lamps providing simple scene lighting such as TV watching, entertaining, reading, or romantic modes..

## PHT02 - Mini Timer Controller

A simple-to-program desk top timer providing automatic timer control of 4 switches or modules and manual control of up to 8 switches or modules. Convenient "bump-in-the-night" button will turn all lights on or off simultaneously. A "security mode" selector can be easily programmed to provide the lived-in look by randomly controlling lighting while away.

## PAT01 - RF Transceiver

This device converts signals sent from handheld wireless remote controls into command signals on the power lines. Multiple remotes can share the same transceiver! Complete with a built-in appliance outlet, excellent for Holiday lighting, nightlights, and coffee makers or electric kettles.

## PHR04-2 Channel RF Keychain Remote

Put it on a keychain or leave in the car or in a purse to control entryway lighting upon arrival home. Each family member will want one!

## PHR03 - 16 Channel RF Remote Control

Attractive contemporary styling blends with any decor. Excellent for complete whole home control from the comfort and convenience of the bedroom, may also be kept in the family room -- the choice is your client's.
